DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: Claim 1 line 9 and 13 "at where close to the" does not properly describe the position of the upper and lower chamber, it is suggested that - in close proximity- - will be a better description. In line 11 "the" seems to be in error for - a- -.

Claim 2 line 3 - -charging the batter is a AC motor- - is suggested in place of "those air compressor components relates to an AC motor". Appropriate correction is required.

Allowable Subject Matter

Claims 1-6 will be allowable if rewritten to overcome the claim objections indicated by the examiner. Applicant is welcome to call and discuss the claim language with the examiner.

The following is an examiner's statement of reasons for allowance: Prior art does not teach in combination with the other limitation of the independent claim a knapsack characterized by having the battery charged with AC power for field use of the air compressor such that the an interlayer in a knapsack has an upper chamber and a lower chamber segregated by the interlay where in the upper chamber is sewn a longitudinal zipper on its periphery the lower chamber being sewn with a lateral zipper, the upper chamber accommodating multiple components of the air compressor.

Conclusion

This application is in condition for allowance except for the following formal matters:

Objections to claims 1-6 as indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
